-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 08 April 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over PROVANZANNA et al. 6,522,031 in view of CLAUDE et al. 6,787,933 and MANSINGH 7,085,660.

Regarding claims 1-14.

PROVANZANNA discloses power load-leveling system having a plurality of mobile, selectively actuated energy sources connected to the grid (figures 1,4).

PROVANZANNA does not disclose the energy generating units and is silent wherein a processor uses data for analyzing the operating conditions of the energy generating units.

CLAUDE et al. discloses the energy generating units having load-leveling capabilities.

MANSINGH et al. discloses energy management system in a power and distribution system wherein load demands are predicted by utilizing very short term load forecasts that are based on historical load data, demand patterns and short term load forecasts (abstract).

Art Unit: 2836

It would have been obvious to one having ordinary skill in the art at the time of this invention to have modified the power load leveling system with the packet electrical storage to include the energy generating units and the energy management system. The motivation would have been to increase the standby energy time duration and to provide the energy management system with the capability to forecast the load requirements based on historical load data and demand patterns of the end users.

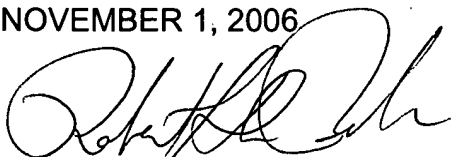

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. CRICHLLOW 6,965,319 discloses energy management using intelligent agents over the internet. SINHA 6,697,951 discloses a subscription service system for customers to decide when to purchase power from the utility or generate their own power.
